Portuguese · native

English · intermediate (comfortable in meetings, still improving fluency)

MATHEUS SILVA FAGUNDES

SAP ABAP & FIORI DEVELOPER

PROFILE

SAP ABAP & Fiori developer with 4+ years in SAP, working on **S/4HANA** with SAPUI5, Fiori Elements, **RAP**, CDS Views and OData. At Grupo Intelsis I build the company's proprietary SAP EHS (Environment, Health and Safety) solution, deployed at a large enterprise client: I worked from development through **Go-Live in June 2026**, and now handle production support and improvements. I also take part in migrating Fiori applications to **SAP BTP**. I build custom solutions when SAP standard does not fit the business, from ABAP backend to Fiori/UI5 frontend.

EXPERIENCE

Grupo Intelsis

Feb 2025 – Present

Proprietary SAP EHS solution · S/4HANA

SAP ABAP / Fiori Developer

- Built the company's proprietary SAP EHS solution for a large enterprise client, from development through Go-Live and production support.
- Applications and reports with RAP (RESTful ABAP Programming Model), CDS Views and OData services.
- Migration of on-premise Fiori applications to SAP BTP.
- SAP Fiori/UI5 applications (Freestyle and Fiori Elements) focused on usability, performance and business rules.
- EHS-specific business rules and validations in business-critical applications.
- Post-Go-Live support: incident analysis, critical fixes and continuous improvement, working directly with the client.

Aggire

Jan 2023 – Feb 2025

SAP ABAP Developer · Goiânia, Brazil

- SAP ABAP development and consulting, maintaining and evolving existing solutions.
- ALV reports, SmartForms, custom screens and changes to ABAP programs.
- Implementation and support of User Exits, Enhancements and BAdIs.
- OData services with SAP Gateway and data modeling with CDS Views.
- SAP Fiori applications (Freestyle and Fiori Elements) integrated with the ABAP backend.

Freelance · ABAP

2022

- First ABAP development projects as an independent developer.

EDUCATION

Systems Analysis and Development · SENAI — May 2023 – May 2025

CERTIFICATIONS

- Creating an SAP Fiori Elements App Based on an OData V4 RAP Service — SAP LEARNING
- Learning the Basics of ABAP Programming on SAP BTP — SAP LEARNING
- Getting Started with Web Development — SAP LEARNING

SIDE PROJECTS

Ruby Sistemas (rubysistemas.com.br): web systems for small businesses, such as online ordering with Pix payments and salon booking. Next.js, Supabase and Vercel.
